

Stand Mixer – Product Overview

Our digital stand mixer is designed for maximum performance and ease of use. Thanks to the digital display with timer function, you are always in full control of the preparation time.

The mixer offers 11 speed settings, ranging from 100 to 938 RPM, so you can always find the perfect speed for the recipe. Its compact size fits in any kitchen and is suitable for both professional and home use.

POWERFUL AND STYLISH

The powerful motor and metal gears ensure excellent performance, even with heavy doughs. With a weight of 17 kg, this stand mixer is stable and sturdy on the countertop. It prevents vibrations and makes the machine run smoothly and quietly.

The strong aluminum housing with silver finish is coated with a scratch-resistant coating, keeping the elegant design looking beautiful for years to come.

SAFE AND EASY TO USE

The stand mixer is user-friendly and safe to use. The tilt-head design allows you to easily remove the bowl or attach accessories. The machine is equipped with a safety switch: when the head is tilted up, the mixer stops automatically. For extra safety, the machine is fitted with a splash guard with a fill opening so you can add ingredients while mixing, without splashing or creating a mess.

ACCESSORIES FOR EVERY TASK

This stand mixer comes with a spacious 6.5-liter stainless steel bowl with handy click system. Included as standard are 3 high-quality stainless steel attachments, so you can mix, knead, whip and stir:

- ✓ **Dough Hook** – for kneading light doughs, cakes and tarts
- ✓ **Whisk** – for whipping cream, egg whites and mousse
- ✓ **Beater** – for mixing cake batter, cookie dough and mashed potatoes

Maximum kneading capacity: 2.0 kg pizza dough or 1.5 kg bread dough.
Minimum flour capacity that can be processed: 0.2 kg.

PLANETARY MIXING FOR PERFECT RESULTS

The stand mixer uses planetary mixing action. The beater rotates around its own axis while moving around the bowl, ensuring all ingredients are mixed evenly with no flour left on the sides. Efficient, powerful and consistent results – for every preparation.

In addition to the digital control, timer function and 11 speed settings, the machine is powerful and versatile. All stainless steel parts are easy to clean and dishwasher safe. A true all-rounder in your kitchen!
